

EC Minutes from 10/22/15

Meeting Called to Order- 3:32pm | Adjourned- 4:27pm

Present: Bess Dawson-Hughes, Saul Malozowski, Anastassios Pittas, David Robbins, Clifford Rosen, James Ware, Michael Lewis

Glucose Measurement by Central Lab (CL)

- Committee discussed how the “shift to the left” in recent glucose results from the CL may be affecting clinical diabetes outcomes.
- Michael reviewed the summary of glucose QC data document- he reported that the performance of the Integra instrument has decreased and samples have been sent to the UVM Medical Center instead of the LCBR.
- Michael suggested that samples should be continued to be tested in the UVM medical center rather than the LCBR because the LCBR wouldn't be able to acquire a replacement instrument until January 2016 at the earliest.

Action: Michael will reach out to other laboratories to assess glucose issue and provide an update at next EC meeting.

Reports Reviewed
