Assessment of QOL/mood in D2d and tools to measure it (SF-12, SF-36, PHQ-9 questionnaires)

- The committee discussed what type of questionnaires (quality of life/ mood) should be given to participants at the M24 visit.
- The committee agreed that both a mood and quality of life questionnaire are relevant. However, the specific questionnaires weren't chosen.
- The SF-12, SF-36, and PHQ-9 were reviewed. There was concern re. the suicidal ideation question on the PHQ-9. The PHQ-8 was recommended as an alternative.

Action: CC will organize a task force to review the questionnaire, goals of the questionnaires and prepare a recommendation for the SC.

Reports Reviewed.
