

Steering Committee (SC) *Meeting Minutes*

Meeting: April 12, 2018

Meeting called to order- 12:05pm | Adjourned- 12:50pm

Present: Adline Ghazi (MedStar- Baltimore), Jean Park (MedStar), Raneer Chatterjee (Duke), Richard Pratley (Florida), Chhavi Chadha (HealthPartners), Neda Rasouli (Colorado), Erin LeBlanc (Kaiser), Anne Peters (LA), Irwin Brodsky (Maine), Pauline Liao (Lenox Hill), Daniel Hsia (Pennington), Sun Kim (Stanford), Karen Johnson (Tennessee), Philip Raskin (UT Southwestern), Patty Sheehan (CC), Anastassios Pittas (CC), Saul Malozowski (NIDDK), Ellen Vickery (CC).

EOS Announcement

- Taso discussed sending out the notification to all sites that D2d End of Study procedures will begin on Monday, April 16th. This means that all visits scheduled for Monday and beyond will be considered the Last Scheduled visit. There may, of course, be the need for a confirmatory visit.
- Sites should be reviewing MOP 20: End of Study (EOS) and contact the Coordinating Center with any questions/clarifications.

D2d Registry

- At the suggestion of NIDDK, to keep the door open for a future long-term observational follow-up study (**no pills, no visits**), we have established a Registry of D2d participants who wish to be contacted in the future and offered the opportunity to participate in the study. At this point there is no follow-up study planned (or funded) but ideas are being considered.
- The registry allows participants to provide their contact information only. Sites give the participant the opportunity to register themselves.
- Participants should be provided with information on the registry during their last visit. Sites should encourage them to sign up and facilitate sign-up (on-line or completing the card). Printed materials have been shipped out to all sites.

Reports Reviewed.
